Learning Objectives, Modules (Lessons), Assignments, and Outline:

Course Objectives:

This course reviews with the student the most commonly found issues in Multi-State Mortgage Committee (MMC) examinations. The Examination findings showed regulators that there was room for improvement for what is considered compliance as common threads of deficiencies were identified. CFPB requires NMLS licensees review these common violations to educate licensees on expected compliance with federal mortgage regulations.

Federal Laws – Module 1

For this module, we will review the importance of Multi-State Mortgage Committee (MMC), and some of the most frequent violations it found during examinations. Regulators want licensees to learn how to properly comply with federal regulations. The student will review the most non-compliant issues found in the examination reports. Laws covered include aspects of ECOA, TILA and RESPA compliance with examples. With this knowledge, students will understand what is considered compliant with the federal laws that govern the mortgage lending industry.

Ethics – Module 2

The student will learn the regulations that govern ethical behavior in the mortgage industry. Some of these laws include: The Bank Secrecy Act Anti-Money laundering rules, Gramm-Leach-Bliley Act privacy rights, Fair and Accurate Credit Transaction Act Identity theft rules, and Telemarketing and Consumer Fraud and Abuse Prevention Act for consumer rights to opt-out. Students will learn what is considered compliance with these mortgage industry regulations, and ways to make ethical based decisions. Students will have a strong understanding of what actions are prohibited after a review of these federal regulations.

Nontraditional Mortgage Products – Module 3

In this module, the student will understand and learn how to adapt to our current changing market with non-traditional loan programs that help to meet borrowers' needs. Programs reviewed are two one buydown and how they can be used in comparison to discount points. The assumption process and the importance of second mortgages to meet the down payment. Adjustable-rate mortgages with current indexes and requirements. Students will understand how these programs benefit the borrower and take a brief review of current industry changes including the United States Space Force (USSF) members eligibility for the VA home loan program.

South Carolina Mortgage Law – Module 4

In this module the students will be able to discuss the authority, structure, and responsibilities of the South Carolina Department of Consumer Affairs and the South Carolina State Board of Financial Institutions, know what activities require a mortgage loan originator license, and recognize prohibited conduct and practices for licensees
